Radon in Schools: What You Need to Know to Properly Manage Radon in Your School

This 1-hour training on indoor air quality in schools—

- Presented the facts about radon in schools—risk, characteristics and prevalence of radon—and why it is necessary to test every school for radon.
- Highlighted effective and practical strategies for radon testing and control, including continuous radon monitoring.
- Described Standards of Practice that address all aspects of radon measurement and mitigation and provide key references for these techniques.
- Assisted participants in increasing their understanding of how radon management fits into an integrated school environmental health program.
- Demonstrated how to replicate the best practices of a school district mentor that has identified and successfully managed radon problems.

Presented by the U.S. Environmental Protection Agency Indoor Environments Division

April
